TotalGuard™

TotalGuard™

TotalGuard™ is Sonitrol's all-in-one, standalone IoT solution and is the combination of one or many different edge-based devices, including TotalGuard™ Smart Hub and its wireless accessories, the Sonitrol Mobile app and the Sonitrol Central Station software. The Central Station software fuses together the edge-based devices, creating an "IoT intrusion panel" that can be managed via the Sonitrol Mobile App and by a Central Station operator. The TotalGuard™ solution can provide impact audio intrusion detection, glass break detection, and hold-up alarm security. Customers utilize the Sonitrol Mobile apps connectivity to TotalGuard™ to view video for any of their locations, as well as to remotely Arm and Disarm their security system.

• **Edge-Based technology** for light weight, verified security

• **TotalGuard™ Smart Hub & Wireless Accessories** allow for added building protection. You can now add to your system TotalGuard™ Motion, Water and Door/Window Sensors.

• **Programmable 24HR, Occupied, and Armed security** level for each alarm. Utilize 24hr security levels for panic buttons, perimeter glass break detection and for areas where people should never be.

• **Central Station Monitoring** of Impact Activated Audio Intrusion Detection, Glass Break analytic alarms, Digital Input alarms, Thermal analytic alarms, PIR alarms and device communication status.

• **Multi-purpose devices** provide Live and Playback video for end user surveillance

• **Conveniently Arm/Disarm** the intrusion system from the Sonitrol Mobile App

TotalGuard™ ALL-IN-ONE, WIRELESS SOLUTION

TotalGuard™ acts as a standalone IoT panel and is packed with features and wireless add-on accessories.

SN-2S-CPIR-W-PANEL (TotalGuard™) & SN-2S-CPIR-W-PANEL-128 (TotalGuard™ 128GB)

- Impact Audio
- Glass Break Analytics
- Digital Input Alarm (Programmable)
- Indoor PIR (Programmable)
- Digital Output
- Entry/Exit Annunciation

SN-NA502S (TotalGuard™ Smart Hub)

- Wireless or Ethernet Connectivity
- Pairs with TotalGuard™ & Wireless Accessories
- 129MB Memory

SN-SZ-DWS08N (TotalGuard™ Door/Window Sensor)

- Wireless Connectivity
- Pairs with TotalGuard™ Smart Hub
- Magnetic

SN-SZ-PIR04SA (TotalGuard™ Motion Sensor)

- Wireless Connectivity
- Pairs with TotalGuard™ Smart Hub
- Pet & White Light Immunity

SN-SZ-WTD03N (TotalGuard™ Water Sensor)

- Wireless Connectivity
- Pairs with TotalGuard™ Smart Hub
- Magnetic

COMPATIBLE TotalGuard™ CAMERAS AND SERVERS

TotalGuard™ devices are installed with a direct connection and alarm reporting to the Sonitrol SONIP Central Station. The following devices can be used as part of a TotalGuard™ solution.

SN-VT-36-AS, SN-VT-36-S (All-In-One Outdoor Thermal)

- Outdoor Thermal Analytic Alarms (Programmable)
- Digital Input Alarm (Programmable)
- Digital Output

SN-2A-B-RIWD-S (All-In-One Exterior Bullet)

- Indoor/Outdoor Video Analytic Alarms (Programmable)
- Digital Input Alarm (Programmable)
- Digital Output

SN-2AD3-IWD-S (All-In-One Exterior Dome)

- Indoor/Outdoor Video Analytic Alarms (Programmable)

SN-2A-IMD-X-S (All-In-One Interior Mini Dome)

- Indoor Video Analytic Alarms (Programmable)

V250-4-2TB, V250-8-2TB, V250-8-4TB, V250-8A16-2TB, V3000, V5000, V7000 Series

- 4 Digital Input Alarms (V250) (Programmable)
- Optionally host other IoT devices
